

Organic and Transitional Education and Certification Program

Toolkit for Stakeholders

The U.S. Department of Agriculture (USDA) is providing up to \$20 million to reimburse agricultural producers and handlers who are certified organic and crop and livestock producers who are transitioning to organic for eligible expenses incurred during fiscal years 2020, 2021, and/or 2022. The new program, [Organic and Transitional Education and Certification Program \(OTECP\)](#), is part of USDA's [Pandemic Assistance for Producers initiative](#).

USDA's Farm Service Agency (FSA) will accept OTECP applications for fiscal years 2020 and 2021 from Nov. 8, 2021, through Feb. 4, 2022. FSA extended the original signup deadline, which was Jan. 7, 2022. The application period for fiscal year 2022 applications will be announced at a later date.

We need your help. We want to ensure producers and handlers of agricultural commodities that are certified organic, and those transitioning to organic, are aware of this program, the extended signup deadline, and the available resources to apply, including how to contact the FSA office at their local USDA Service Center and FSA's call center. This toolkit is meant for partners and stakeholder groups to share information in their networks. It includes:

- Key messages,
- Newsletter article reflecting Feb. 4 deadline, and
- Social media posts with graphics reflecting Feb. 4 deadline.

Answers to frequently asked questions can be found at farmers.gov/otecp/faq.

Please contact us at fpac.bc.press@usda.gov with any additional questions.

December 2021

Key Messages

- During the COVID-19 pandemic, certified organic and transitional operations faced challenges due to loss of markets, increased costs, and labor shortages, in addition to costs related to obtaining or renewing their organic certification, which producers and handlers of conventionally produced commodities do not incur.
- Transitional operations also faced the financial challenge of implementing practices required to obtain organic certification without being able to obtain the premium prices associated with certified organic commodities.
- USDA's [Organic and Transitional Education and Certification Program \(OTECP\)](#) provides up to \$20 million to reimburse agricultural producers and handlers who are certified organic and crop and livestock producers who are transitioning to organic for eligible expenses incurred during fiscal years 2020, 2021, and/or 2022.
- OTECP funding is provided through the Coronavirus Aid, Relief, and Economic Security Act (CARES Act).
- OTECP is open to certified operations and transitional operations located in the 50 United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the U.S. Virgin Islands, and the Commonwealth of the Northern Mariana Islands.
- For each fiscal year, OTECP covers 25% of a certified operation's eligible certification expenses, up to \$250 per certification category (crop, livestock, wild crop, handling, and State Organic Program fee). This includes application fees, inspection fees, USDA organic certification costs, state organic program fees and more.
- Crop and livestock operations transitioning to organic production may be eligible for 75% of a transitional operation's eligible expenses, up to \$750, for each year. This includes fees charged by a certifying agent or consultant for pre-certification inspections and development of an organic system plan.
- For both certified operations and transitional operations, OTECP covers 75% of the registration fees, up to \$200, per year, for educational events that include content related to organic production and handling to assist operations in increasing their knowledge of production and marketing practices that can improve their operations, increase resilience, and expand available marketing opportunities.
- Additionally, both certified and transitional operations may be eligible for 75% of the expense of soil testing required under the National Organic Program (NOP) to document micronutrient deficiency, not to exceed \$100 per year.
- OTECP builds upon USDA's Organic Certification Cost Share Program (OCCSP) which provides cost share assistance to producers and handlers of agricultural products who are obtaining or renewing their certification under the National Organic

December 2021

Program (NOP). OTECP expands upon this assistance by including those transitioning to organic production.

- After hearing feedback from stakeholders, USDA is giving organic producers additional time to apply for OTECP for 2020 and 2021 by extending the signup deadline from Jan. 7, 2022, to Feb. 4, 2022. The application period for 2022 will be announced at a later date.
- Applicants may apply for OTECP through the Farm Service Agency (FSA) office at any USDA Service Center. Producers can find contact information for their local Service Center at farmers.gov/service-locator.
- Applicants may also call 877-508-8364 to speak directly with a USDA employee ready to provide one-on-one assistance.
- FSA will issue OTECP payments after the end of the application period for each fiscal year. If calculated payments exceed the amount of available funding, payments will be prorated.
- Visit farmers.gov/otecp for additional information, including more details on eligibility and resources to apply.

Deadline Extended to Apply for Pandemic Support for Certified Organic and Transitioning Operations

The U.S. Department of Agriculture (USDA) has extended the deadline for agricultural producers who are certified organic, or transitioning to organic, to apply for the [Organic and Transitional Education and Certification Program \(OTECP\)](#). This program provides pandemic assistance to cover certification and education expenses. The deadline to apply for 2020 and 2021 eligible expenses is now Feb. 4, 2022, rather than the original deadline of Jan. 7, 2022.

Signup for OTECP, administered by USDA's Farm Service Agency (FSA), began Nov. 8.

Program Background

Certified operations and transitional operations may apply for OTECP for eligible expenses paid during the 2020, 2021 and 2022 fiscal years. Signup for the 2022 fiscal year will be announced at a later date.

December 2021

For each year, OTECP covers 25% of a certified operation's eligible certification expenses, up to \$250 per certification category (crop, livestock, wild crop, handling and State Organic Program fee). This includes application fees, inspection fees, USDA organic certification costs, state organic program fees and more.

Crop and livestock operations transitioning to organic production may be eligible for 75% of a transitional operation's eligible expenses, up to \$750, for each year. This includes fees charged by a certifying agent or consultant for pre-certification inspections and development of an organic system plan.

For both certified operations and transitional operations, OTECP covers 75% of the registration fees, up to \$200, per year, for educational events that include content related to organic production and handling in order to assist operations in increasing their knowledge of production and marketing practices that can improve their operations, increase resilience and expand available marketing opportunities. Additionally, both certified and transitional operations may be eligible for 75% of the expense of soil testing required under the National Organic Program (NOP) to document micronutrient deficiency, not to exceed \$100 per year.

Producers apply through their local FSA office and can also obtain one-on-one support with applications by calling 877-508-8364. The program application and additional information can be found at farmers.gov/otecp.

Additional Organic Support

OTECP builds upon USDA's [Organic Certification Cost Share Program \(OCCSP\)](#) which provides cost share assistance of 50%, up to a maximum of \$500 per scope, to producers and handlers of agricultural products who are obtaining or renewing their certification under the NOP. Although the application period for OCCSP ended Nov. 1, 2021, FSA will consider late-filed applications for those operations who still wish to apply.

Meanwhile, USDA's Risk Management Agency (RMA) recently made [improvements to Whole-Farm Revenue Protection](#) to make it more flexible and accessible to organic producers.
